It would be great if FM & AM could reach out 100 miles or so to let me know what going on in a large city that I am approaching. I drive tractor trailer and it is important to me to have weather and mostly traffic updates so that I have time to take different routes if need be. With XM radio, I have that feature and wish to keep it. XM satellite radio keeps all the drivers and other people with XM informed of all news and weather and traffic 24 hours aday. Its the greatest and I urge the FCC to reject NAB's petition 04-160 and support XM's ability to provide the kind of programming that I need for my work and pleasure.

Thanks for your time in this matter  
Tom Lederhouse
